**Subject:** Private Drinking Water Information surrounding Claywood Park

Good afternoon Todd,

My name is Kevin Rowsey and I work for US EPA Region III. Our office is working with the Chemours company and their contractor, AECOM, to identify private drinking water wells in the area around Claywood Park PSD. I think that AECOM has previously reached out to you about the area your water system serves.

I wanted to ask you if you have any information regarding possible additional drinking water wells to the east of your water system. We're trying to identify all of the private drinking water wells in the area for possible PFOA contamination from the Washington Works facility. Many times, it's water utilities that have the most up-to-date information on drinking water sources in the area. It's very important that we reach all the residents in your area to ensure that no one falls between the cracks. Human consumption of PFCs can be life threatening.

I also wanted to ask if Claywood Park PSD has conducted any monitoring for PFCs (particularly PFOA) in your raw and treated water. Do you know if there has been any previous monitoring at your facility?

Sincerely,

**Kevin Rowsey**
